Bachelor of Computer Application

2022 - 2025

Amity University

- CGPA - 8.19

PROJECTS

Link Organizer – [Chrome Extension](#)

Aug 2025 - Present

- Developed a professional **Chrome extension** enabling users to categorize and manage **important links** by **topics** within the **browser**.
- Integrated a modern, **responsive UI** with **glass morphism** effects and **keyboard-first** workflows for quick productivity.
- Implemented **favicon auto-detection**, **display name parsing**, and **enter-key-based fast** add operations.
- Featured **one-click export/import backup** option to **prevent data loss**; **enabled auto-backup** and **prompt restore using Chrome Sync**.
- Prioritized a **seamless, safe**, and **user-friendly experience** for managing **collections** of **useful links**.

Portfolio Website- [Link](#)

Aug 2025 - Present

- Designed and developed a modern **Frontend Portfolio** website using **HTML**, **CSS**, and **JavaScript**, highlighting key **Skills**, **Projects**, **Technologies**, **Resume** in a single platform.
- Showcases **live demos** and detailed summaries of **major projects** (such as **Chrome Extensions**, **UI Clone projects**, **Link Organizer** etc.) for **recruiters** and **clients** to easily explore technical capabilities.
- Created a **responsive, visually appealing interface** using **gradients**, **card layouts**, and **interactive hover effects**, ensuring a seamless experience across all devices and browsers.
- Integrated **call-to-action buttons for GitHub** and **direct links for projects** making professional outreach and connection simple and direct.
- Structured sections for **about**, **skills**, **projects**, and **contact**, making navigation intuitive and content easily discoverable.
- Demonstrated proficiency in advanced web design techniques, including **glass morphism**, **flexbox/grid**, and **accessibility** best practices.
- Optimized performance and **SEO** for **fast load times** and **increased online visibility**.
- Self-hosted on **GitHub Pages for high availability** and **minimalist deployment**.

CourseZ – [Link](#)

June 2024

- Project involves creating a **clone** or **replica** of the **CourseZ** website's user interface.
- To learn and practice front-end development skills such as **HTML**, **CSS**, and **JavaScript**.
- To understand **UI/UX design** principles by replicating a professional layout.
- Better understanding of layout techniques like **flexbox** or **grid**.

SKILLS

- **Programming Skills:** Html , CSS , JavaScript
- **Frameworks:** Next.js, React.js
- **Tools:** Perplexity , Vs-Code , ChatGpt , Bolt
